

Our line service staff stay very active during rainy season! They keep our planes washed, fueled and ready for use at a moment's notice.

MEETING UP

Last year we missed out on seeing Bonnie in MN, but we got an hour together when she came to Nairobi on a recent missions trip!

AIM AIR HAPPENINGS

Phil has been keeping up with the necessary audits for AIM AIR (21 in total for the year). Recent Quality manual amendments got the Kenya Civil Aviation stamp of approval.

A group of aviation students from Liberty University comes out this month to intern with AIM AIR. Pray that these students will sense God's leading. Pray for Phil and the crew as they invest in these students.

Many nomadic tribes in Kenya and South Sudan don't know how to read, which makes audio Bibles very important! AIM AIR recently brought audio Bible trainers to north Kenya to train local pastors how to use the audio Bibles, as well as how to evangelize and provide discipleship by creating oral study groups. Pray for these pastors as they take home the audio Bibles in their local heart languages. As one pastor put it, "God speaks my own language!"

HOSTING

We've had so many people coming and going through Nairobi – what fun to host them, show them around, and provide a meal or two. Our hearts are full of encouragement! The guestroom has seen a lot of activity.

We recently had Congolese friends over for lunch, complete with birthday cake!

Cultural tidbit: They did not open their birthday gifts in front of us. Five year old Robert said, "I'll open mine at home."

SUNDAY SCHOOL

We were able to share about missions with the children's Sunday School classes at our Nairobi church. What a joy to encourage them to pursue God's calling on their lives! Making paper airplanes to help them remember their Bible verse was an added bonus (Matthew helped too!).

Thank you for your partnership through prayer and financial giving!
